VOLUNTARY AND INFORMED CONSENT FORM

Please initial each section to indicate the information was provided.

Initials: SECTION I. The following information was presented to me in writing at least 24 hours before the abortion by___________________________, who is (check one):

☐ the physician who is to perform the abortion;  ☐ a referring physician.

1. The following information concerning the physician who will perform the abortion;
   A. The name of such physician;
   B. the year in which such physician received a medical doctor’s degree;
   C. the date on which such physician’s employment commenced at the facility where the abortion is to be performed;
   D. whether any disciplinary action has been taken against such physician by the state board of healing arts by marking either a box indicating “yes” or a box indicating “no” and if the box indicating “yes” is marked, then provide the website addresses to the board documentation for each disciplinary action;
   E. whether such physician has malpractice insurance by marking either a box indicating “yes” or a box indicating “no”;
   F. whether such physician has clinical privileges at any hospital located within 30 miles of the facility where the abortion is to be performed by marking either a box indicating “yes” or a box indicating “no” and if the box indicating “yes” is marked, then provide the name of each such hospital and the date such privileges were issued;
   G. the name of any hospital where such physician has lost clinical privileges; and
   H. whether such physician is a resident of this state by marking either a box indicating “yes” or a box indicating “no”;

2. a description of the proposed abortion method;

3. a handbook titled, If You Are Pregnant (available in print form and on-line);

4. description of the risks related to the proposed abortion method, including risk of premature birth in future pregnancies, risk of breast cancer and risks to my reproductive health and alternatives to the abortion that a reasonable patient would consider material to the decision of whether or not to undergo the abortion;
5. the probable gestational age of the unborn child at the time the abortion is to be performed and that Kansas law requires the following: “No person shall perform or induce an abortion when the unborn child is viable unless such person is a physician and has a documented referral from another physician not financially associated with the physician performing or inducing the abortion and both physicians determine that: (1) the abortion is necessary to preserve the life of the pregnant woman; or (2) a continuation of the pregnancy will cause a substantial and irreversible physical impairment of a major bodily function of the pregnant woman.” If the child is born alive, the attending physician has the legal obligation to take all reasonable steps necessary to maintain the life and health of the child.

6. no person shall perform or induce a partial birth abortion on an unborn child unless such person is a physician and has a documented referral from another physician who is licensed to practice in this state and who is not legally or financially associated with the physician performing or inducing the abortion and both physicians provide a written determination that: the partial abortion is necessary to save the life of a mother whose life is endangered by a physical disorder, physical illness or physical injury, including a life endangering physical condition caused by or arising from the pregnancy itself;

7. the probable anatomical and physiological characteristics of the unborn child at the time the abortion is to be performed;

8. the contact information for counseling assistance for medically challenging pregnancies, the contact information for perinatal hospice services and a listing of websites for national perinatal assistance, including information regarding which entities provide such services free of charge;

9. the medical risks associated with carrying an unborn child to term; and

10. any need for anti-Rh immune globulin therapy, if I am Rh negative, the likely consequences of refusing such therapy and the cost of the therapy.

Initials:   SECTION II. The following information was presented to me in writing at least 24 hours before the abortion by_______________________, who is (check one):
☐ the physician who is to perform the abortion; ☐ a referring physician;
☐ a qualified person (an agent of the physician who is a psychologist, licensed social worker, registered professional counselor, registered nurse or physician). I have been informed in writing that:

1. A handbook titled, If You Are Pregnant is available in printed form and on-line that describes the unborn child, and a Directory of Available Services that lists agencies which offer alternatives to abortion with a special section listing adoption services and a list of providers who offer free ultrasound services.

2. medical assistance benefits may be available for prenatal care, childbirth and neonatal care, and more detailed information on the availability of such assistance is contained in the printed materials given to me and described in K.S.A. 65-6710, and amendments thereto;

3. the father of the unborn child is liable to assist in the support of my child, even in instances where he has offered to pay for the abortion (in the case of rape this information may be omitted);
4. I am free to withhold or withdraw my consent to the abortion at any time prior to invasion of the uterus without affecting my right to future care or treatment and without the loss of any state or federally-funded benefits to which I might otherwise be entitled;

5. the abortion terminates the life of a whole, separately unique, human living being; and

6. by no later than 20 weeks from fertilization, the unborn child has the physical structures necessary to experience pain. There is evidence that by 20 weeks from fertilization unborn children seek to evade certain stimuli in a manner that in an infant or an adult would be interpreted to be a response to pain. Anesthesia is routinely administered to unborn children who are 20 weeks from fertilization or older who undergo prenatal surgery.
